

Despite millions in infrastructure investment, organizations are continually affected by cyber incidents. It is more often a lack of training, not infrastructure, which allows a threat to become a security incident. Give your security team a thorough understanding of how to operate within your organization's security framework so they may fully leverage the tools they already have at their disposal. With the right knowledge base, your organization may be protected from cyber attacks with your existing infrastructure.

### Why Choose Stormwind?

With massively engaging content, Hollywood style HD delivery, and passionate instructors that live and breathe IT, Stormwind EPIC Live was designed and inspired by eliminating everything we despise about traditional, boring online and classroom training.

**Hollywood meets IT training: online classrooms never looked this good.**

### Key Benefits

Stormwind's Cyber Security Bundle provides 24x7 access, short work-friendly sessions with the best instructors in the business, and cinema-quality content to help students stay engaged. With the breadth of security topics available, at a bundled price that can't be matched anywhere else, the StormWind Cyber Security Bundle delivers the following key benefits:

- **Assessment Skills:** Develops security threat intelligence skills that protect organizations from cyber threats.
- **Prevention Skills:** Emphasizes penetration testing as a proactive approach to securing networks.
- **Planning and Framework Skills:** Leverage the different tactics organizations employ in protecting their information systems.
- **Forensic Skills:** Respond effectively, get a full picture of what happened, identify your vulnerability

### What You Get

The Cyber Security Bundle includes a full year of access to the following certification-based security courses:

- CompTIA Security+
- CyberSec First Responder: Threat Detection and Response
- EC Council Certified Ethical Hacker (CEH)
- (ISC)<sup>2</sup> Certified Information Systems Security Professional (CISSP)
- (ISC)<sup>2</sup> Certified Cloud Security Professional (CCSP) – Coming in 2016

The bundle includes a year of access to:

- ✓ Multiple LIVE instructor-led class events
- ✓ 24x7 access to Instant Replays - On Demand HD video recordings of the Live class sessions
- ✓ Certification Practice Exams (where applicable)
- ✓ Hands-On Labs (where applicable)
- ✓ 1:1 Mentoring
- ✓ Student Study Guides

**Maximize Your Budget – And Get your Team Trained NOW**

A single StormWind course is typically HALF the cost of traditional classroom training, but with our Cyber Security bundle priced at less than the cost of TWO security courses, you can afford to turn your entire team into a highly trained security SWAT team - and do it in less time.

**Other Training Providers**

**StormWind EPIC Live**

**Course Fees**

Most training providers charge around \$3500 for a SINGLE 5-day security course – and that include the T&E costs for each of your team members to attend.

StormWind’s Cyber Security Bundle price is less than you would pay for TWO security courses from other providers. And there’s ZERO hit to your travel budget.

**Productivity Loss**

Multiply the weekly salary of each person you need to get trained by the number of courses they SHOULD attend - the indirect costs of attendance skyrocket, as does the amount of time your network suffers from neglect.

With EPIC Live you don’t have to leave a skeleton crew monitoring your network while a select few “go to training”. With online delivery of short sessions and immediate access to On Demand recordings, training can be done anytime, anywhere – including ON THE JOB.

**Time to Competence**

At \$3500 per course, or more, how many courses can you afford to send each team member to in a given fiscal year? How long do you typically have to wait in order to “find the right time” to send them?

Get your team started TODAY. They don’t have to “wait for the next course”, and they can attend ALL classes in the bundle as many times as they need or want for a full year.

**Mitigate the BIGGEST Threat to your Network: Your End Users**

Increase your security posture quickly and with minimal investment by ensuring that your end-users are equipped with the knowledge necessary to be good stewards of your organizations’ data. From the CEO to the new sales representative, any individual that has access to your information system needs a thorough understanding of their effect on cybersecurity.

StormWind’s Cyber SAFE End User Security Awareness and Certification program is designed for non-technical end-users of computers, mobile devices, networks, and the Internet – really, any connected user. Students will learn to identify many of the common risks involved in using conventional end-user technology, and learn ways to use it safely, protecting themselves and their organization from those risks.

For more information about Cyber SAFE End User Security Awareness and Certification, please contact your StormWind sales representative. Enterprise pricing is available.
