

## A Better Way with:

# Disaster Recovery as a Service

Large or small, no business can afford downtime or lost data. In the past, only large organizations had the budget to maintain the complexity of traditional DR solutions. Today, the cloud has opened the door to an affordable disaster recovery solution allowing increased data protection for businesses of any size.

## Business Impact of NOT Being Prepared

The question is no longer if but when a disaster will strike and the consequences of being unprepared can be catastrophic.

### BUSINESS FAILURE

As many as 50% of all organizations have inadequate DR plans to survive a disaster.

### LOST PRODUCTIVITY

71% of IT decision makers are not confident in their ability to recover

### FIANANCIAL LOSS

\$2.1 trillion – total cost of data breaches in 2019

### TARNISHED REPUTATION

64% of companies experienced major disruptions in the last 12 months

## Top Causes of Data Loss and Downtime

44%

Software corruption

32%

Hardware failure

14%

Computer virus

7%

Power loss/interruption

3%

Natural disasters

Eliminate expenses such as hardware, space, power & staff

Cost Effective

Simplifies meeting compliance requirements (HIPAA, PCI, etc.)

Simple

## Disaster Recovery in the Cloud

Fast

Dramatically improve RTO from hours/days to minutes

Flexible & Scalable

Adapt to changing business needs and IT environments

Cloud-based disaster recovery as a service solutions are gaining momentum with small to midsize businesses helping them create better IT and business outcomes.

## A Better Way:

## xRaaS

Our full-service Recovery as a Service (xRaaS) offering allows you to leverage all the benefits of the cloud, the expertise of our people, and the power of our secure data centers. We help you deliver the outcomes your business wants in the most cost-effective manner.

- **Easy to Manage** – Plan, deploy, test, and support without adding staff and resources.
- **Secure & Compliant** - Advanced data centers are SSAE 16 SOC2 compliant.
- **Rigorous Testing** – Regular testing to ensure your critical data can be recovered.
- **Portal Visibility** – 24x7 access to your SLA performance.
- **Complete** – Supports private, hybrid, and public clouds.
