

FIND OUT HOW SECURE YOU (REALLY) ARE

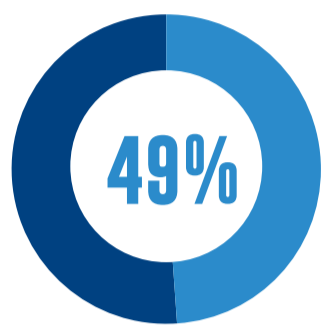

With **over half** of security professionals saying their organization lost customers or revenue after an attack last year*, security is something that all business leaders should be thinking about.

...ARE YOU?

THE RISKS OF INADEQUATE SECURITY

According to **Cisco's annual report**, digital threats are having a big impact on organizations.

OF THE BUSINESSES THAT WERE ATTACKED LAST YEAR:

49% experienced public scrutiny after a security breach*

22% lost customers because of the attack*

29% lost revenue because of the attack*

THERE IS EVEN MORE AT STAKE

Not every organization will experience a large-scale attack or security breach. But, you're still putting a lot at risk if you don't address potential vulnerabilities and keep security top of mind.

<p>YOUR ASSETS</p> <p>Stolen assets or intellectual property can take away competitive advantages</p>	<p>YOUR TIME</p> <p>It can take weeks to contain an attack after it's discovered</p>	<p>FINES & LITIGATION</p> <p>Compliance fines and lawsuit costs can cripple a business</p>	<p>REMEDICATION COSTS</p> <p>There can be a substantial cost to remediate even a single ransomware attack</p>	<p>YOUR REPUTATION</p> <p>Losing brand trust and reputation can be worse than everything else</p>
--	---	---	--	--

THE QUESTIONS TO ASK YOURSELF

In today's landscape where ransomware and malware run rampant, security shouldn't be an afterthought. As a leader, you should be asking yourself these questions.

- ARE OUR MOST VALUABLE ASSETS AS PROTECTED AS THEY SHOULD BE?
- AM I DOING ALL I CAN FROM A SECURITY PERSPECTIVE?
- HOW CAN WE ENSURE THAT SECURITY REMAINS TOP OF MIND?

START BY UNDERSTANDING YOUR SECURITY VULNERABILITIES

To find out how secure you really are, understanding your vulnerabilities is a great first step. At Xigent, we can conduct a thorough evaluation of your potential security risks, as well as develop a strategy and actionable plan for mitigation.

<p>1. WE START WITH YOUR FISAScore</p> <p>FISA evaluates your risk across administrative, physical, and internal/external controls.</p>	<p>2. WE HELP YOU ADDRESS THOSE RISKS WITH BEI.SECURE</p> <ul style="list-style-type: none"> We build an action plan to remediate vulnerabilities We manage the plan to ensure activity execution We provide updates and FISAScore reassessments We lead regular reviews to track overall progress
