OUR CYBERSECURITY OFFERINGS:

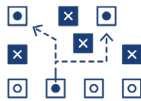

ASSESSMENT

Understand your security posture with a comprehensive assessment of your IT environment. Meet industry and government requirements.

CONSULTING

From policies and procedures to architecture and design, our security experts can help.

TRAINING

Your employees are your most vulnerable security threat. Keep them up-to-date on social engineering threats and best practices to avoid them.

vCISO

Do you have the budget for a full-time security executive but could use the guidance? Leverage our experience and expertise to achieve enterprise level security.

TECHNOLOGY

We partner with a range of leading security technology providers and can help you understand which IT security product is best for your business.

RECOVERY

Recovering from an attack is as important as protecting against one, but it can be complex and expensive. We can help by creating and running actionable, cost effective recovery and archive plans.

Xigent Solutions specializes in helping mid-market organizations develop and/or run a security program that is appropriately sized and tested. We create security plans unique to your business.

About Xigent Solutions

WHAT

We help our customers achieve greater business outcomes through IT.

HOW

We utilize our outcome improvement methodology approach leveraging multiple process to deliver a solution that is mapped to business outcomes as defined by stakeholders.

WHY

We provide a comprehensive suite of IT service and solution capabilities (people, process, and technology) that support our outcome improvement approach.
